A LIBERAL PROPOSITION.

Who has not heard of that paragon of family papers, the enterprising and popular Weekly Detroit Free Press? For a generation its name has been a household word, and it has become a synonym for all that is excellent, pure and elevating in journalism. It is delightfully entertaining without resort to cheap sensationalism, instructive without being prosy or pedantic. Combining the literary qualities of the expensive magazine with the light, breezy characteristics of the newspaper, it leaves nothing to be desired by the average reader. It is looked upon as a welcome visitor by every family who reads it, while thousands regard it as indispensable, and would on no account go without it. An enormous circulation of 125,000 copies per week attests its wonderful popularity. Recognizing the fact that there are those who are unfamiliar with its surpassing merits as a home paper, the publishers offer to send The Free Press to them for the balance of this year (over five months) for only 30 cents—a club of four for \$1 or a club of ten for \$2. All our readers should subscribe at once. Send for free sample copy.

Notice to Subscribers.

All unpaid subscriptions are due to and should be paid only to the undersigned. All unexpired subscription will be continued until their expiration. C. M. FOXSTON.

Changes of Climate.

Kill more people than is generally known. Particularly is this the case in instances where the constitution is delicate, and among our immigrant population seeking new homes in those portions of the West, and where malarial and typhoid fevers prevail at certain seasons of the year. The best preparation for a change of climate, or of diet and water which that change necessitates, is Hostetter's Stomach Bitters, which not only fortifies the system against malarial, a variable temperature, damp, and the debilitating effects of tropical heat, but is also the leading remedy for constipation, dyspepsia, liver complaint, bodily troubles specially apt to attack emigrants and visitors to regions near the equator, mariners and tourists. Whether used as a safeguard by sea voyagers, travelers by land, miners, or of agriculturists in newly populated districts, this fine specific has elicited the most favorable testimony.
